Hi Rob,

We told the agencies at the meeting that the table of 143 accessible sediment samples was included in the COPC selection tables deliverable that you sent to EPA in early February (Table 5), but it sounds like that message may have been missed.

Here it is again in the version to be included in the draft BHHRA report. Please let me know if there are any questions.

Regards,

Betsy

Subject: Table?

EPA is asking for Status of NJDEP's request from last tech mtg for table from HHRA that has sample IDs for 143 samples representing potential public access areas.
